

Per-class IoU — three criteria given separately

Largest amplitudes: truck, wall, train, fence · 95% CI excluding 0: truck, train, sidewalk, road (rises) and person, bicycle (falls) · Holm(19): NO rise survives, the only surviving class is a fall (bicycle, Holm 0.0038)

19 classes: 11 rises, 8 falls
filled = Holm(19) < 0.05 · open = CI excludes 0
only · grey = ns

The 4 largest rises and the 3 largest falls, compared to the 4 experts the MoE is initialised from
